

SuiteMed™ IMS for Endocrinology

A fully integrated EHR / Practice Management solution specifically designed to meet the needs of the Endocrinologist

SuiteMed IMS Endocrinology EHR is an intuitive solution with advanced features enabling Endocrinologists to automate their inefficient manual processes and achieve a true paperless environment. The system integrates the entire care delivery process; enhancing the healthcare experience for you and your patients.

Endocrinology Templates and Workflow

Automate documentation, complete exams and diagnostic tests quickly and easily with point and click Endocrinology template content and workflow. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

If you do physical exams, hormone challenge tests and standard phlebotomy in different rooms, automatically migrate this patient data from any computer throughout the office or between multiple locations. SuiteMed IMS makes all patient records instantly available for each staff member as the patient flows through your office during their appointment. From ordering special materials prior to nuclear studies, to tracking who logs into the EHR, a lot of repetitive tasks can be streamlined into a few clicks to curb human error and improve your practice's measurable outcomes.

EHR Certified

ONC-ATCB Certified 2011/2012 Complete EHR

SuiteMed IMS EHR v.14 is 2011/2012 compliant and has been certified by the Certification Commission for Health Information Technology (CCHIT®), an ONC-ATCB, in accordance with the applicable certification criteria for Eligible Providers adopted by the Secretary of Health and Human Services. **This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.**

(9/30/2010; CC-1112-372910-1; NQF 0421, NQF 0013, NQF 0028, NQF 0041, NQF 0024, NQF 0038, NQF 0059, NQF 0064, and NQF 0061; Sybase SQL Anywhere 9.0.2 for 170.302(s), Sybase PowerBuilder Cryptography Library, Chilkat 3rd party Encryption Library for 170.302(u) and 170.302(v), and Internally Developed Patient Portal for 170.304(g))

SuiteMed IMS for the Endocrinology Practice

- Simplify patient visits with endocrinology-specific templates for faster, more comprehensive documentation, storage and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements and business analysis.
- Access patient information at the point of care, no more chart-pulls and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with patient portal and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies and labs for referrals, orders and results.
- Local ongoing support from a national team of industry experts -- SuiteMed Authorized Partners, dedicated to serving the needs and interests of the endocrinologist.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for endocrinology-specific tests, procedures and disease management.

“ My bad-debt write-offs have been reduced over 90%. Pre-SuiteMed IMS, we had an average of \$80,000 per month outstanding in charges waiting for referral. Since implementation of SuiteMed IMS we now regularly maintain no more than \$400 per month. The Authorization tracking screen helps us in timely follow-up with the insurance companies. The billing module is great, in a way we now know what ensures timely payments. The aging reports help our billers set priority of follow-ups, making sure we work in the right areas. ”

Julie Ziehm
Billing Manager

Cardiology Associates

SuiteMed IMS Endocrinology Specific Features

• Authorization / Referral Tracking

Set authorization requirements by procedure and insurance, Insurance approved pre-printed authorization forms, Reduce missing authorizations and claim rejections saving time and money.

• Single View for Entire Patient Information

Simplified workflow increases productivity and quality of care. Access demographics, history, clinical notes, physical exams, trends of electronic lab results and clinical alerts while administrating the entire treatment plan from a single screen.

• Exams

Predefined templates are available for conducting physical exams on any part of the body. Templates also include medical drawings that enable endocrinologists to comment and import images visually clarifying the patient's clinical condition

• Clinical Forms and Reminders

Comprehensive visit forms such as Diabetes Type-1, Type-2, and weight loss tracking (before and after results) are available. Clinical reminders can be established based on age, gender and medical conditions. Diagnoses, procedures, and medications can be linked with reminders for automated health maintenance alerts.

• Document and Image Management

Eliminate paper by capturing, scanning and attaching paper charts, Diabetology images, photographs, x-rays, and medical drawings directly into the electronic chart.

• Lab Interfacing and Tracking

Electronically transmit and receive lab orders. Simplify decisions with automated flagging of abnormal results, analyze, track and trend results.

The SuiteMed Difference

SuiteMed's Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why SuiteMed ensures your success with local **Authorized Partners**, experienced in health IT and certified in our solutions.

SuiteMed Authorized Partners are with you all the way, from demonstrating SuiteMed IMS to implementation and beyond – your local ongoing single source solutions partner. As your Authorized Partner we're always available for fast on-site or phone support, training and personalized revenue improvement services so you can concentrate on practicing medicine not technology.

Document and Image Management of Diabetology images, photographs, etc.

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Whereas an EHR Module certification means that the product meets at least one of the 33 criteria tested.
