

SuiteMed™ IMS for Internal Medicine

A fully integrated EHR / Practice Management solution specifically designed to meet the needs of Internal Medicine

SuiteMed IMS Internal Medicine EHR is an intuitive solution with advanced features enabling the Internist to automate their inefficient manual processes and achieve a true paperless environment. The system integrates the entire care delivery process; enhancing the healthcare experience for you and your patients.

Internal Medicine Templates and Workflow

Automate documentation, complete exams and diagnostic tests quickly and easily with point and click family practice template content and workflow. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the Internist, electronically receive and send referrals, review faxed lab reports and import photographs. This allows easy annotations directly to the patient visits on images and photographs at the point of care. Order and review lab results from anywhere in the EHR. At the end of the day documentation and letters are completed and sent. SuiteMed IMS EHR allows you to leverage technology to better manage your practice and your patients' health.

EHR Certified

ONC-ATCB Certified 2011/2012 Complete EHR

SuiteMed IMS EHR v.14 is 2011/2012 compliant and has been certified by the Certification Commission for Health Information Technology (CCHIT®), an ONC-ATCB, in accordance with the applicable certification criteria for Eligible Providers adopted by the Secretary of Health and Human Services. **This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.**

(9/30/2010; CC-1112-372910-1; NQF 0421, NQF 0013, NQF 0028, NQF 0041, NQF 0024, NQF 0038, NQF 0059, NQF 0064, and NQF 0061; Sybase SQL Anywhere 9.0.2 for 170.302(s), Sybase PowerBuilder Cryptography Library, Chilkat 3rd party Encryption Library for 170.302(u) and 170.302(v), and Internally Developed Patient Portal for 170.304(g))

SuiteMed IMS for Internal Medicine

- Simplify patient visits with internal medicine-specific templates for faster, more comprehensive documentation, storage and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements and business analysis.
- Access patient information at the point of care, no more chart-pulls and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with patient portal and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies and labs for referrals, orders and results.
- Local ongoing support from a national team of industry experts -- SuiteMed Authorized Partners, dedicated to serving the needs and interests of the Internist.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for internal medicine-specific tests, procedures and disease management.

“ I have been using an EMR since 2003 but when I was looking to really go paperless I chose SuiteMed IMS because of the different features they included to get a physician closer to be completely paperless. Because I was familiar with an EMR I knew exactly what I wanted and the team worked with me to customize the software with templates specific to pediatrics. One of my preferred features is the interface with the state immunization registry followed by the document management as a close second. I also like the different reports we can easily pull. The support staff is pretty attentive to our concerns. If you really want to go paperless and be compliant with the different guidelines SuiteMed IMS is the one for you. ”

SuiteMed IMS Features for Internal Medicine

• Internal Medicine-specific Templates

Documenting conditions and symptoms is faster and more accurate using intuitive templates. Access comprehensive clinical content—document a complete office visit, including pre- and post-op appointments, with user-friendly, internal medicine-specific templates.

• Auto Check-In

Auto Check-In Kiosk feature lets the patients Check-In on their own. This feature reduces workload and helps in managing a high patient flow.

• E-Prescribing and Prescriptions

The flexible and comprehensive prescription module tracks medications and refill history. Improve patient care with drug education integration, dosing, allergy and drug interaction and contraindication checks.

• Authorization / Referral Tracking

Reduce missing authorizations and claim rejections with authorization checking at Check-In and Charge Posting. Authorization requirements can be set by procedure and insurance criteria.

• Bar Coded ID Cards

Register patients with accuracy and speed using fully automated Bar-Coded ID Cards. Have accurate patient verification and correct critical data with just a swipe. ID cards can be printed from the scheduler, at check-in/out and reports. Manage high patient flow with a fast and accurate check-in process.

• Document & Image Management

Condense and organize files into a user-friendly, easily accessible digital document file cabinet. Organize documents with customized folder tabs, the integrated fax management module allows you to fax from the system, scan in documents, images, driver licenses, insurance cards, etc

• Lab Ordering, Reviewing and Tracking

Supports HL7 interface so you can send or receive diagnostic lab orders electronically. Customized test templates and pre-printed order forms. Pre-import checking. Comparative and graphical representation of lab data saving physicians' time.

• Plus so much more

Scheduler, Patient Portal, Integrated Appointment Reminders, Auto Check-In, Check-In/Out, Lab Orders & Tracking, Letter Writing, My Tasks Dashboard, Health Maintenance Reminders, Dispensary, Document Management, Reports Preparation and Management, Fax Management, Scan Module, Billing & Collections, Auto Form Filler, etc.

The SuiteMed Difference

SuiteMed's Ambulatory Electronic Health Record (EHR) and Practice Management software are fully integrated sharing a single database, to meet your unique clinical and administrative needs. Our solutions can be implemented as an integrated solution or separately as stand-alone applications and can be deployed as a client-server or web-hosted solution.

It takes more than just software to deliver success in today's complex practice. That's why SuiteMed ensures your success with local **Authorized Partners**, experienced in health IT and certified in our solutions.

SuiteMed Authorized Partners are with you all the way, from demonstrating SuiteMed IMS to implementation and beyond – your local ongoing single source solutions partner. As your Authorized Partner we're always available for fast on-site or phone support, training and personalized revenue improvement services so you can concentrate on practicing medicine not technology.

Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Whereas an EHR Module certification means that the product meets at least one of the 33 criteria tested.
